A socially responsible contributor to the global energy mix
These materials are being supplied to you by Genel Energy plc (the “Company”) solely for your information and for use at this presentation and does not constitute a prospectus or offering memorandum or an offer in respect of any securities. All numbers and charts included in this presentation are from Company data unless specified otherwise. This presentation is confidential and is being distributed to selected recipients only. These materials may not be reproduced in any form, redistributed or passed on, directly or indirectly, to any other person or published, in whole or in part, by any medium or for any purpose. Failure to comply with this restriction may constitute a violation of applicable securities laws.

The presentation and these materials do not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, or any offer to underwrite or otherwise acquire any securities, nor shall any part of these materials or the fact of their distribution or communication form the basis of, or be relied on in connection with, any contract, commitment or investment decision whatsoever in relation thereto. The information included in the presentation and these materials is subject to updating, completion, revision and amendment, and such information may change materially. No person is under any obligation to update or keep current the information contained in the presentation and these materials, and any opinions expressed in relation thereto are subject to change without notice. In addition, past performance is not indicative of future results.

The presentation and materials do not constitute an offer of securities for sale in the United States or in any other jurisdiction. Securities will not be registered under the US Securities Act of 1933 as amended (the “Securities Act”), and may not be offered or sold in the United States absent registration or an exemption from registration. The distribution of these materials in other jurisdictions is not intended, and may also be restricted by local law or regulation, and persons into whose possession these materials come should inform themselves about, and observe, any such restrictions.

This presentation includes forward-looking statements and projections that reflect the Company's intentions, beliefs or current expectations. Forward-looking statements involve all matters that are not historical fact. The Company has tried to identify those forward-looking statements by using the words "may", "will", "would", "should", "expect", "intend", "estimate", "anticipate", "project", "believe", "seek", "plan", "predict", "continue" and similar expressions or their negatives. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Such statements are made on the basis of assumptions and expectations that the Company currently believes are reasonable, but could prove to be wrong. Such forward-looking statements are subject to risks, uncertainties and assumptions and other factors that could cause the Company's actual results of operations, financial condition, liquidity, performance, prospects or opportunities, as well as those of the markets it serves or intends to serve, to differ materially from those expressed in, or suggested by, these forward-looking statements. Important factors that could cause those differences include, but are not limited to: changing business or other market conditions, general economic conditions, and the Company's ability to respond to trends in its industry. Additional factors could cause actual results, performance or achievements to differ materially. These forward-looking statements speak only as of the date of this presentations. The Company and each of its directors, officers, employees and advisors expressly disclaim any obligation or undertaking to release any update of or revisions to any forward-looking statements in the presentation or these materials, and any change in the Company's expectations or any change in events, conditions or circumstances on which these forward-looking statements are based, except as required by applicable law or regulation. No information included in this presentation is intended to be a profit forecast or a financial projection or prediction.

By attending the presentation or by accepting any copy of the materials presented, you agree to be bound by the foregoing limitations.
WE ARE GENEL ENERGY

• Genel Energy is an oil and gas exploration and production company, with operations primarily in the Kurdistan Region of Iraq
• Our strategy is focused on the generation of cash from low-cost and low-carbon oil production, providing a compelling mix of growth and returns
• We aim to be a world-class creator of shareholder value, and a company that has a positive impact on society through fueling economic growth and directly supporting the communities in which we operate

Our strategy:

Generate cash
Low-cost and high-margin production generating a material amount of cash

Invest in growth
Rapidly recycling capital into assets with the potential to deliver significant and sustained cash flow growth

Return excess cash to shareholders
Generating sufficient cash throughout the investment cycle to fund a material and progressive dividend
AN ESTABLISHED BUSINESS MODEL

- Our business model ensures that we are resilient in times of a low oil price, and thrive when it is high
  - Retained material dividend when the oil price crashed in 2020, while making material investment in taking Sarta to first oil
  - Dividend increased at half year 2021 as the external environment improved
- We are committed to running the business in a way that mitigates downside risk and maximises wider benefits
  - Financial discipline
  - Rigorous risk management
  - A focus on ESG and sustainability
- Cash-generative, low-cost, high-margin, resilient 2P reserves
- Rapid, capital efficient development of discovered resource
  - Appropriate investment in appraisal and exploration assets targeting reserves replacement
- The current spike in the oil price does not change our focus on the fundamentals of our business model
A SOICALLY RESPONSIBLE CONTRIBUTOR TO THE GLOBAL ENERGY MIX

• We aim to have a positive impact by fueling economic growth and directly supporting the communities in which we operate
• 2022 represents 20 years of operations in the KRI, which we will commemorate through the Genel20 programme, launching significant new social activities throughout the year aligned with UN Sustainable Development Goals
• Genel strives for safe operations with the goal of zero lost time injuries and zero tier one loss of primary containment events across our operations
• An asset portfolio fit for a future of fewer and better natural resources projects
  – 2021 carbon intensity of 16 kgCO2e/bbl for scope 1 and 2 emissions (global oil and gas industry average of 20 kgCO2e/boe)

16 kgCO2e/bbl
cope 1 and 2 emissions in 2021

34
local companies supported by Genel

$60 million
spent on social projects in KRI since 2002

GF Results 2021 - 15 March 2022
2021 – MATERIAL FREE CASH FLOW

- Low-cost production averaged 31,710 bopd in the year, in line with 2020
  - Tawke PSC production remains robust
  - Sarta net production of 1,920 bopd offset Taq Taq decline
  - Total 11.6 MMbbls produced in 2021
- Production business highly cash generative, generating $239 million of net income after opex and cost recovered capex
  - Opex $4/bbl
  - $50 million capex, net liquidity impact of $12 million after cost recovery
  - $21/bbl net income after opex and cost recovered capex
- Company free cash flow of $86 million in 2021, pre dividend payments
  - Significant investment in growth: c.$110 million spent at Sarta and Qara Dagh
  - Benefited from $35 million received for deferred receivables
  - Impacted by KRG reversion to payments three months in arrears, meaning 10 payments received rather than 12 (impact of $65 million)
PROGRESSIVE DIVIDEND

• Genel remains committed to a material and progressive dividend
  – 16¢ per share (2020: 15¢ per share) paid to shareholders in 2021
  – Total $44 million paid in 2021
• Final dividend of 12¢ per share announced
  – Bringing total dividends relating to the 2021 financial year to 18¢ per share
  – 20% year on year increase
• The dividend remains our preferred method of capital returns
MARGIN PER BARREL SET TO INCREASE IN 2022

- Production business cash generation set to materially increase
  - Production remains robust and highly cash-generative, with guidance in line with that of 2021
  - Cash generation per barrel of $29/bbl at Brent $90/bbl, including deferred receivables recovery and cost recovered capex:
    - Tawke PSC c.$75 million
    - Taq Taq $10-20 million
    - Production asset capex has net liquidity impact of c.$20 million after cost recovery
  - Final Tawke override payment expected in October, relating to production in July 2022, meaning 10 override payments expected in 2022
- Free cash flow over $250 million at guidance production and Brent $90/bbl
- Should the current oil price strength persist, Genel will consider return of cash to shareholders in addition to our commitment to a material and progressive dividend
PUTTING OUR CASH TO WORK

• Formidable balance sheet at 31 December 2021:
  – Cash of $314 million
  – Net cash $44 million
• Material 2022 cash generation will add to this liquidity
• Balance sheet provides us with significant opportunity to deliver growth and returns
• Since 2018:
  – Material cash generation even after investment in growth has facilitated material returns to shareholders
  – With the balance going to rebuilding the balance sheet
• Going forward
  – Capital allocation focuses on the generation of cash, and in 2022 the priority remains maximising our low-cost high-margin production
  – Continuing efforts to build a diverse portfolio that supports a material and progressive dividend, resilient in the long-term, and replacing the cash generation from the Tawke override
OPERATIONAL FOCUS IN 2022

- The focus is once again on maximising our low-cost high-margin production
- Genel has a balanced portfolio of production and development assets with the ability to generate long-term cash flow
  - 104 MMbbls of 2P oil reserves
  - 122 MMbbls of 2C oil resources
- The Tawke PSC will see a material increase in drilling activity
  - Operator expects production of c.105,000 bopd in 2022
- At Taq Taq, we are working with the MNR and our partner with a view to the resumption of drilling in H2 2022
- At Sarta, appraisal continues
  - Sarta-1D now on production
  - Drilling operations on Sarta-5 are complete, well-testing operations set to be conducted
  - Sarta-6 spud in February
- Appraisal results of Sarta-5 and Sarta-6 will be incorporated into our assessment of reserves at the appropriate time
SARTA-2 & 3: Generating cash whilst informing development plans

- Gross production averaged 6,400 bopd in 2021
- 2.5 million barrels produced in total by year end 2021
- $30 million net revenue, c.$15 million net operating profit
SARTA – PROFITABLE PILOT PRODUCTION

SARTA-2 & 3: Generating cash whilst informing development plans

• Gross production averaged 6,400 bopd in 2021
• 2.5 million barrels produced in total by year end 2021
• $30 million net revenue, c.$15 million net operating profit

SARTA-1D: A smart completion, already adding to production

• Production achieved from all zones within the Mus, Adiayah and Butmah reservoirs
• Upper zones produced dry oil, lower zones a mixture of oil and water
• Initial production from upper zones targeting rate of 2,500 bopd
SARTA - PROFITABLE PILOT PRODUCTION

SARTA-2 & 3: Generating cash whilst informing development plans
- Gross production averaged 6,400 bopd in 2021
- 2.5 million barrels produced in total by year end 2021
- $30 million net revenue, c.$15 million net operating profit

SARTA-1D: A smart completion, already adding to production
- Production achieved from all zones within the Mus, Adiyah and Butmah reservoirs
- Upper zones produced dry oil, lower zones a mixture of oil and water
- Initial production from upper zones targeting rate of 2,500 bopd

SARTA-4: Safeguarding our revenue and providing headroom to bring on other zones
- Recompleted as a water injection well at the end of last year
- Provides a medium-term option to dispose of produced water from the PILOT

FY Results 2021 - 15 March 2022
Sarta-5: Surface well testing to commence shortly

- 12 km updip from the PILOT EPF
- Tests reservoir connectivity and deliverability
- Will test the full suite of Jurassic reservoirs
- Being set up to monetise oil early in success

Sarta-6: Spud in January, results expected in Q3 2022

- 6 km downdip from the PILOT EPF
- Tests reservoir connectivity and deliverability
- Will test the Khurmala heavy oil and the full suite of Jurassic reservoirs
- Will be produced immediately through a dedicated flowline to the EPF in success
- Option for a contingent sidetrack
• **QD-2 well suspended in December 2021 having encountered insurmountable technical problems**
  
  − The well encountered an unexpected major thrust fault which put the reservoir objective significantly deeper than prognosed and demanded a radical modification of the well trajectory to reach it
  
  − Three side-tracks of the main wellbore were subsequently attempted but ultimately failed due to a lack borehole stability around the structurally complex crest of the structure - at the time of suspension the reservoir objective was estimated to be between 700-1,500m below the drill bit still

• **The geological case remains untested and prospectivity undiminished by the QD-2 result.**
  
  − Post well analysis to inform next steps ongoing having entered a one year extension to January 2023
- Farm-out agreement signed relating to the SL10B13 block, Somaliland, with OPIC Somaliland Corporation
  - OSC receives a 49% working interest in the block for a cash consideration of 49% of all Genel's historic back costs, plus a cash premium
- Highly prospective block with multiple stacked prospects with over 5 billion barrels of prospective resources identified
- Field partners working to plan exploration drilling, with aim of drilling a well in 2023
  - Estimated gross well cost of c.$40 million
- 150 kilometres from the port at Berbera, offering a route to international markets
2022 OUTLOOK – FREE CASH FLOW, SIGNIFICANT OPPORTUNITY

- Investment in growth, creating catalysts for value creation
  - Appraisal at Sarta has potential to add production and reserves
- At $90/bbl, free cash flow in excess of a quarter of a billion dollars is anticipated, based on guidance production
  - Year-to-date average of $95/bbl
  - $10/bbl increase/decrease impacts free cash flow by c.$50 million
- Genel continues to seek inorganic growth opportunities
- Committed to paying a material and progressive dividend

![Graph showing free cash flow sensitivity to average Brent](image)

- Increased cash generation
- High-impact well results at Sarta
- Progressive dividend
- Potential reserve additions
